No audience.

David Rich gave maintenance report. Well pump #2 was flooded when the park flooded December 29, 2013 and the heaters were replaced. When the temperatures went to -20 the new heaters was unable to keep pipes from freezing, pipes burst, the weighted 1 one check valve froze and blew side out of six inch main. The elevated tank monitoring also froze which caused the tank to overflow and drain on ground storage tank, the alarms did not notify David. With this we have had complaints of rusty water due to tank being drained and stirring up the sediment. Waiting on repairs for Well #2, we are operating on only Well #1. Our crews from New Castle Correctional Facility have been working on clearing the sidewalks of downtown, and streets. With no other business to be brought before the board, Meeting adjourned.

The foregoing excerpts of minutes are hereby certified to be true and correct.
